PREFACE

This bibliography is intended to serve as a supplement to publication 51-1 which contained references on Manitoba's Precambrian up to 1950. The present list covers the period 1950 to 1957.

The bibliography is divided into four parts. Part I contains references indexed according to the names of authors, listed in alphabetical order. The full titles and references are given in this section. In Part II references are indexed according to subject and only the author's name and date of publication are given for each subject reference. The full reference may be obtained by refering back to Part I. Part III lists references according to geographical location, followed by general topics; as in Part II only the author's name and date is recorded in Part III.

Lists of geophysical and geological maps, published from 1951 to 1957 by the Manitoba Mines Branch and the Geological Survey of Canada, are contained in Part IV.

A number of publications and reports written prior to 1950 but omitted from the earlier bibliography, 51-1, have been included in the present bibliography. These have been placed in the appropriate places in Parts I, II, and III, and are listed separately in the Appendix.

Grateful acknowledgement is made to the libraries and geological departments of Canadian universities for their assistance in providing titles of theses dealing with Manitoba. Of particular help was the information provided by the Geological Survey of Canada.

It would be appreciated if any errors or omissions are brought to the attention of the Mines Branch.

LIST OF ABBREVIATIONS

The following list gives both abbreviated citation and full name of periodicals and serials that have been cited in this publication:

A.I.M.E. Trans. - American Institute of Mining and Metallurgical Engineers
Transactions. New York.

Am. Jour. Sci. - American Journal of Science. New Haven, Pa.

Am. Mineralogist - American Mineralogist. Ann Arbor, Mich.
